SustainableTechnologies

Re: Sustainable Technologies, Mounting Plate and Membrane Vacuum Form

This letter is in response to an inquiry related to the installation of the Sustainable Technologies, Mounting Plate and Membrane Vacuum Form, as shown below over a Carlisle PVC or KEE HP roof system assembly.

As clarification, the Sustainable Technologies, Mounting Plate and Membrane Vacuum Form product in question is vacuum formed by Sustainable Technologies using PVC or KEE HP roof membrane supplied by Carlisle Construction Materials under the brand name of Sure-Flex which is supplied by Carlisle SynTec Systems.

Installation of the Sustainable Technologies, Mounting Plate and Membrane Vacuum Form product will not impact any Carlisle SynTec Systems issued warranty provided the installation is completed by the Carlisle authorized contractor that installed the initial roof system assembly.

Please note that the Sustainable Technologies, Mounting Plate and Membrane Vacuum Form product is not included as part of the Carlisle roof system warranty as it is not a product that is manufactured by or sold as a Carlisle SynTec Systems component. Any leaks that result to the roof system assembly as a result of the photovoltaic overburden are not covered by the terms and conditions of any Carlisle warranty.

If you have any questions or require additional assistance, please feel free to contact us.

Sincerely,

A handwritten signature in black ink, appearing to read "John C. Greko".

John C. Greko

PVC Product Manager

Carlisle SynTec Systems, a division of Carlisle Construction Materials
